### GENERAL RISK PROBABILITY IN THE CONTEXT

**71,04%**

The First part of our proposed methodology focuses on the assessment of vulnerabilities and threats across the country. This approach is comprehensive and multidimensional, encompassing political, economic, sociocultural, technological, ecological, and legal aspects. Furthermore, it considers specific threats such as terrorism, organized crime, protests, common crime, cybercrime, climate disasters, and medical threats.

Data collection is carried out using official government sources, national and international media, and individual testimonials in each country. This approach ensures a broad and diverse view of the region's situation. Data is collected over a 30-day period, allowing for real-time analysis and its progressive evolution. Once the information is gathered, it is classified into different categories of vulnerabilities and risks. Each category is evaluated on a scale of 1 to 5, with 1 being the lowest level and 5 being the most severe. This scale allows for a quantitative assessment, facilitating comparison between different categories.

The purpose of this methodology lies in the need to understand and measure vulnerabilities. Countries are diverse and complex, with a variety of challenges and opportunities. By providing a quantitative assessment, it offers tools for evaluation and decision-making, research, and understanding of the situation in each country.

Lastly, the methodology is dynamic and adaptable. By collecting data from a variety of sources and updating the information every 30 days, it can keep up with rapid changes in the political, economic, and social environment. This is especially important in a region like Latin America, where conditions can change quickly.

The second part of our protective intelligence framework is used to assess and quantify the probability of general risk to any individual or organization in a context, by evaluating the vulnerabilities and threats within the designated area.

The scores help in understanding the severity of deficiencies (General Vulnerabilities) and capabilities (General Threats), which then are used to calculate the overall risk probability.

## 1. General Vulnerabilities (measured by the inadequacy of controls)

1.1 Deficiencies in the System (PESTEL) - rated from 1 to 5, with 1 being adequate, 2 having some inconsistencies, 3 being deficient, 4 being very deficient, and 5 being totally ineffective.

1.2 Deficiencies in Response Capacities: Police, Armed forces, Disaster Management and, Emergency & Medical- rated from 1 to 5, with 1 being adequate, 2 having some inconsistencies, 3 being deficient, 4 being very deficient, and 5 being totally ineffective.

## 2. General Threats (measured by capabilities)

2.1 Resources: Personel, Weapons, Equipment, Transportation- rated from 1 to 5, with 1 being nonexistent, 2 being low, 3 being medium, 4 being high, and 5 being unlimited (or unknown).

2.2 Information about: Type of crimes, Criminal Resilience, surveillance and Intelligence capability, Ability to co-opt internal staff - rated from 1 to 5, with 1 being unlimited, 2 being high, 3 being medium, 4 being low, and 5 being nonexistent (or unknown).

## 3. General Risk in the context (Average between CRP, IC, GTC)

In this part of the methodology, a comprehensive evaluation of the overall risk in a specific context is conducted. This evaluation is based on the average of three key components. The first component is Inadequate Controls (IC), referring to security or preventive measures that may be insufficient or not functioning correctly. The second component is the General Threat Capability (GTC), which assesses the potential dangers that threats might pose in each scenario due to their capabilities. The third and final component is the Country Risk Probability (CRP), which considers the inherent risk level in the country based on PESTEL and TOPCMEX measures. By summing these three components, we obtain the General Risk Probability in the Context in the context, providing a comprehensive measure of the risk level to which an individual or entity may be exposed.

## GENERAL VULNERABILITIES (INADEQUANCY CONTROLS)

VULNERABILITIES	BACKGROUND	HELPS LATAM EXPERT ANALYSIS	SCORE
<b>POLITICAL</b>	Political Landscape and Challenges in Colombia.	In Colombia, political tensions escalated between October and November 2024 due to challenges in President Gustavo Petro's "Total Peace" policy. The persistence of FARC and ELN dissidents highlights structural issues, while criticisms of agreement implementation undermine public trust. Additionally, perceptions of corruption and political polarization exacerbate social fragmentation, hindering consensus and weakening the institutional stability necessary for progress.	<b>4.0</b>
<b>ECONOMIC</b>	Colombia's Economic Slowdown Amid Trade and Fiscal Adjustments.	Between October and November 2024, Colombia's economy showed limited growth, with an annual projection of 1.5%, according to the World Bank. The government proposed renegotiating FTAs and adjusting the budget to meet fiscal rules. While Asobancaria highlighted a new growth phase, quarterly GDP reflected a slowdown, influenced by challenges in international trade and weak domestic dynamics compared to the region.	<b>3.0</b>
<b>SOCIOCULTURAL</b>	Social Dynamics and Challenges in Colombia.	Colombia faced social challenges, including threats to 164 journalists, risking freedom of expression. Progress was made in peace processes with dissident groups and civil society, but criminal violence persisted in Medellín and Valle de Aburrá. Recovering historical memory became crucial to addressing victims' needs and fostering social cohesion.	<b>3.0</b>
<b>TECHNOLOGICAL</b>	Technological Advancements and Cybersecurity Concerns in Colombia.	Colombia's technological landscape highlighted growing vulnerabilities, particularly in cybersecurity. Increased cyberattacks targeted financial institutions and individual users, exposing gaps in digital infrastructure and security protocols. Criminal groups leveraged technology for coordination and evasion, complicating law enforcement efforts. While digital transformation initiatives advanced in urban areas, rural regions lagged, exacerbating the digital divide. The need for robust technological policies and investments remains critical to safeguard economic stability and public trust.	<b>3.0</b>
<b>ECOLOGICAL</b>	Environmental Pressures and Sustainability Challenges in Colombia.	Colombia faced ecological challenges from illegal mining and deforestation in Amazonas and Chocó, driven by armed groups, threatening biodiversity and displacing communities. Climate variability, including rainfall and landslides, disrupted infrastructure and agriculture. Weak enforcement of environmental regulations hindered mitigation efforts, highlighting the urgent need for comprehensive policies to protect natural resources and vulnerable populations.	<b>4.0</b>
<b>LEGAL</b>	Justice Under Strain: Legal Challenges in Colombia.	Colombia's legal landscape faced significant scrutiny. Allegations of impunity resurfaced, particularly concerning unresolved cases of forced disappearances and extrajudicial killings. Legal reforms to enhance justice efficiency were criticized for insufficient implementation and transparency. The influence of organized crime on judicial processes further eroded public trust, while high-profile corruption cases underscored systemic weaknesses. Strengthening the rule of law remains imperative to restore confidence and uphold democratic principles.	<b>3.0</b>
<b>AVERAGE SCORE</b>		<b>VULNERABILITY PERCENTAGE</b>	
<b>3,33</b>		<b>66,66%</b>	

THREATS	BACKGROUND	HELPS LATAM EXPERT ANALYSIS	SCORE
<b>TERRORISM</b>	<b>FARC Dissidents and ELN Escalate Attacks:</b> Colombia's Ongoing Terror Threats.	Between October and November 2024, Colombia faced escalating terrorist threats. In Cauca, FARC dissidents targeted key infrastructure, while ELN attacks in Norte de Santander used IEDs against security forces. Regional counterterrorism efforts remained underfunded and fragmented, underscoring the need for a unified strategy to address the evolving tactics of armed groups and protect critical infrastructure.	<b>4.0</b>
<b>ORGANIZED CRIME</b>	<b>Cartel Clashes and Coca Expansion:</b> Colombia's Organized Crime Surge	Organized crime surged in Colombia. In Buenaventura, cartel clashes over drug routes fueled violence and disrupted trade. Coca cultivation rose in Norte de Santander, aiding armed groups. Authorities uncovered drug smuggling networks, but criminal adaptability remains a challenge. Enhanced interagency coordination is crucial to counter organized crime's pervasive impact on security and the economy.	<b>4.0</b>
<b>CIVIL UNREST</b>	Tax Reforms and Rural Unrest Ignite Nationwide Protests in Colombia.	Colombia faced escalating protests. Demonstrations in Bogotá highlighted discontent with tax reforms, while strikes in Cauca demanded better protections for rural farmers amid ongoing violence. Students nationwide protested reduced education budgets, clashing with police in Medellín. The government's response, criticized as heavy-handed, fueled further unrest. These events underscore deep socio-economic divides and the urgent need for dialogue to address grievances and prevent further escalations.	<b>3.0</b>
<b>COMMON CRIME</b>	<b>Rising Urban Crime:</b> Colombia's Everyday Security Challenges.	Common crime surged in Colombia between October and November 2024. Bogotá reported increased street robberies, with organized theft rings targeting public transportation. In Medellín, neighborhoods experienced higher rates of extortion, straining local businesses. Kidnappings in rural areas, particularly in Antioquia, underscored the vulnerability of isolated communities. Despite targeted police operations, limited resources and corruption hindered effective action. Strengthening community policing and judicial efficiency is critical to restoring public confidence.	<b>4.0</b>
<b>HEALTH THREAT</b>	<b>Dengue Outbreaks and Healthcare Strain:</b> Colombia's Medical Crisis Deepens.	Between October and November 2024, Colombia faced significant medical threats. Dengue outbreaks in Valle del Cauca and Chocó overwhelmed healthcare systems, with hospitals reporting capacity shortages. Rural areas, already strained by violence, struggled with vaccine access amid rising respiratory infections due to climate variability. Underfunding and logistical challenges hindered efforts to address these crises, underscoring the urgent need for strengthened public health infrastructure and emergency response coordination.	<b>3.0</b>
<b>ENVIRONMENTAL</b>	Environmental crisis puts 185 Colombian municipalities on red alert.	Colombia faces a severe environmental crisis, with 185 municipalities on red alert for wildfires, landslides, and floods. Regions like Cundinamarca, Tolima, and Nariño are heavily impacted, with wildfires destroying forests and rainfall increasing landslide risks. This crisis threatens lives, infrastructure, and food security, while exacerbating social conflicts in areas affected by armed groups. IDEAM warns of worsening conditions.	<b>4.0</b>
<b>CYBERCRIME</b>	<b>Ransomware and Data Breaches:</b> Colombia's Cybersecurity Under Attack.	Colombia faced a surge in cyber threats between October and November 2024. Hackers targeted financial institutions with ransomware attacks while phishing scams plagued small businesses and individuals. In Bogotá, a breach exposed sensitive government data, highlighting critical vulnerabilities in digital infrastructure. The rise in social engineering tactics and lack of robust cybersecurity measures emphasized the urgent need for stronger legislation and investment in cybersecurity to protect digital ecosystems.	<b>3.0</b>

<b>3,57</b>		<b>71,42%</b>	

**El Dorado International Airport:** The Civil Aeronautics Authority has declared the capacity of El Dorado International Airport for the Summer 2024 season, which runs from March 31 to October 26. The operational capacity remains at 74 operations per hour. The maximum number of arrivals will be 34 operations per hour, distributed in various ways throughout the day.

## HOSPITALS

Hospitals are operating normally, National Hospital Fundación Santa Fe de Bogotá, it's the biggest and most well-equipped medical facility in Bogotá. The San Juan de Dios Hospital in Cali is the one that offers the highest complexity service in the city. For Medellin, the San Vicente Foundation University Hospital stands out as the health center with the best care indices.

## ROADS

Roads in the country are functioning as usual. But there have been incidents on the perimeter roads heading to Cali. Several of these attacks aim to block access to the city and destroy infrastructure.

## HOTELS

The hotels in the country operate normally. It is recommended to stay in Bogota at the hotels, Hotel Movich Buró 26 or Ayenda Bioma 1010, in Cali at the Hotel Spiwak Chipichape or Ayenda Bugatier, and in Medellin at the Sites Hotel or 14 Urban Hotel.

## INTERNATIONAL MOBILITY

There have been no changes in Colombia's immigration policies during April 2024. It is estimated that 18.5 million people entered and left the country during 2023. The highest flow of refugees and migrants is from Venezuela, with an approximate figure of 2.48 million people.
